## NWT Labour Force Activity - March 2013 -

Statistics Canada estimates that, in March 2013, out of 32,100 residents 15 years of age and older 21,800 persons were employed in the Northwest Territories, representing an employment rate of 67.9%. Nationally, Canada's employment rate stood at 60.8%.

This was the sixth consecutive month the employment rate declined, resulting in the lowest rate since January 2011. Nevertheless, in previous years, March tends to mark the end of the seasonally low winter employment rates.

Those not in the labour force also declined from the previous month, however there were an additional 300 persons actively seeking employment resulting in an increase in the unemployment rate to 8%.

### NWT Labour Force Activity
